

TechNordic

# TechNordic

The strong Nordic ICT region

**120,000** ICT employees  
**1,000** ICT researchers  
**6,000** ICT students  
**9,000** ICT companies

Software development. Hardware development. Telecommunication and wireless systems. Cloud solutions. IT systems. Test facilities. Automation. Gaming. Fintech. UI/UX. Embedded systems.

No matter what you seek within the development and application of ICT, TechNordic is the place to find highly qualified assistance. We are home to both world-leading university researchers and market-leading companies, and products developed in the region can now be found all over the world – and in outer space.

Collaboration across national borders gives us unique conditions for combining a wide range of competences into new innovative technologies and solutions – and for developing a joint eco-system for innovation and the facilitation of new ground-breaking ICT companies.

## World-class ICT competences

These are a selection of the many fields within which our researchers and companies are specialized:

Smart Energy **Communication Systems**  
Software Engineering & Technology

Microwaves & Antennas **Photonics**  
Data-Intensive Systems Healthcare Technology

**EdTech** **Wireless Technologies**  
Security Telecommunications Gaming Fintech  
Smart City IoT/Industry 4.0

**Connected Health**  
**Logistics & Transportation**  
Embedded Systems

# Selected products developed in the TechNordic region

The TechNordic region brings together the three strong ICT clusters IKT-Norge (Norway), BrainsBusiness (Denmark) and Business Region Göteborg (Sweden). We are close to each other and connected to the world, being home to some of Scandinavia's leading ports and airports. This is one of the reasons why the region is a much-coveted location when international concerns are looking for the best place to open new branches in dynamic environments in close proximity to subcontractors and research collaborators.
