

# Software Developer

## About the position

As a Software Developer at SafeEx, you will be part of an international team of developers that are constantly improving the SafeEx maintenance system. You will mostly be programming based on a design specification, stipulating the functional and UI design. There is, however, room for innovation and creativity.

Some of your daily tasks will be:

- Software Development
- Testing
- 2nd line customer support
- System documentation
- Peer code review

## About you

As a professional you:

- Are great at developing in JavaScript, and you have an interest in becoming even better. Knowledge of tools and frameworks like Bootstrap, Apache Cordova, React, Meteor, and others are appreciated.
- Can program in Python and want to grow your knowledge base. Experience with Django is a plus!
- Have a great eye for design and have UI and UX very much in mind while creating a new solution. Experience in Graphic Design and tools like Gimp or Photoshop are a definite plus.
- Have a wide understanding of how to build and maintain good applications.
- You are not scared of expressing your opinion and speaking up for what you believe in, but don't hold any grudges if the decisions we make don't go your way.
- Produce good quality code and respect the team's processes and requirements.
- Write clear and well-documented solutions.

As a person you:

- Are self-driven and independent.
- Know when to ask for help.
- Can keep a cool head when things are hot.
- Have a can-do attitude.
- Are eager and patient when needing to help someone.
- Can take criticism.
- Have a good sense of humor, but remain professional the whole day.

## About SafeEx

SafeEx ApS is a Danish company that delivers inspection and maintenance software to the Oil and Gas industry. We aim to help our customers gain real-time data and quality assurance of all their routines – thus improve safety on their units.

We're a smaller company that emphasizes freedom under responsibility and a flat organizational hierarchy. Everyone is encouraged to contribute across the board and should not hesitate to share their ideas. This, we believe, builds the foundation for professional and personal development for our employees in many different directions.
